ARTIST / PROJECT

ABOUT SINEGRAPH

Sinegraph is a Vancouver-based electronic music project founded and led by producer and artist Zedbee (Alireza Zahmatbar). Created following his studies in Digital Music Production at Langara College, the project has evolved through melodic house, deep house, electronic jazz, electronic rock and techno.

Across releases, original visual productions and live performances, Sinegraph has developed an identity centered on atmospheric electronic production, cinematic storytelling and the connection between sound and image.

Today, Sinegraph operates as a solo artist-led project under Zedbee's creative direction, with 10+ unreleased tracks in production and a growing focus on more energetic electronic and techno material.
